Preface

It took me four years to complete the book. Throughout this period, my students and companions consistently inquired about the publication date. Before Covid-19, while teaching spoken English at a prominent institute in the country, I designed materials for my students that gained widespread acceptance and confirmed their effectiveness. This inspired me to write a book, aiming to be 100% student-friendly by addressing all their learning needs neglected by traditional books.

The framework of the book was devised before Covid-19, and I began working on it at the start of the lockdown amid the global crisis. Day in and day out, I worked for a year and completed a document file. However, upon revising the book, its contents failed to satisfy me. Subsequently, I delved into research, identifying prevalent language gaps and their better solutions. Unfortunately, I lost the document file, causing devastating frustration. Nevertheless, with countless support and inspiration from my parents, I found the motivation to start afresh, and eventually, I produced a satisfying version.

I have designed this book by integrating knowledge, skill, and attitude to maximize learning output, helping the readers eliminate language barriers and illustrate subject matter knowledge and information by using English a speaking tool, regardless of professional and academic life success. Believe me, this book has the highest productivity and practicality compared to any other book in the market.
